 Developed Website using HTML, JavaScript, and WebGL API to embed Augmented Reality.
- Hurix System Pvt.
Programmer Jan. 2018 to Sept. 2018
 E-learning project: Scholastic is a web application, Building this application with the help of ES6, jQuery, HTML, SCSS, DOM, and sprite animation.
Projects:
 - Scholastic
 It's an E-learning project, especially for small kids to learn the alphabet, shapes, songs, colors, and animals; the application is used in schools to teach the English language. Templates are designed and developed from a kid's perspective attractive and user-friendly having multiple animations, videos, and audios for specific alphabets and objects. Templates are built with the help of ES6, jQuery, HTML, SCSS, DOM, and sprite animations.
- Sycamore Software Solution
Software Engineer Nov. 2014 to Jan. 2018
 Developed websites and web applications for clients like Warner Brothers using a scripting language and other web-based technologies (WB ESB).
Projects:
 - Hollywood Movies Website Development
 Developed Hollywood movies website and web application using JavaScript, HTML 5, CSS, jQuery, and XML.
 - The Lego Batman movie (<http://www.legobatman.com/>)
 The Lego Batman movie website is developed using HTML5, CSS3, JavaScript, and jQuery.
 - Wonder Woman (<http://wonderwomanfilm.com/>)
 Wonder Woman movie website is a Tumblr website, this website was built using HTML, JavaScript, and jQuery and retrieving data from XML.

- Localization of websites
Localization of websites in different languages, such as Latin America, German, French, Spanish, Italian, Thai, Brazil, Chinese, Japanese, Korean, etc.
We provide Localization as a service to our clients Warner Brothers and LG, where I use to translate those websites into their respective languages.
